

Class 1 are preparing for Spring by learning about plants and new life in our new topic of 'Growing'.

Pick 'n' mix

Literacy

Learn to say a poem off by heart. Can you identify the rhyming words? You could even have a go at creating your own poem.

Science

Discuss and draw the lifecycle of a plant or animal.

Maths - Counting

Compare how many seeds are inside different fruits and vegetables. As numbers get more tricky (such as counting the number of seeds in a Pepper or a Squash) think about how you could keep track of the objects counted, such as putting them into groups of 10.

Maths - Measure

Measure the length of roots or leaves using standard measures (a ruler) or uniform non-standard measures such as cubes. Compare using words such as "longer", "shorter", "longest" and "shortest".

ICT

Take photos of at least 5 different plants inside and outside of your home. If possible, can you independently send them to print?

RE

Talk as a family about what you like about Easter and how do you celebrate it. Do you hunt for eggs? Do you visit a farm? Do we go to Church?

Make and Do

Design an Easter card for a loved one.
