Click on a different question to take you to that page!

What is winter?

What weather will we see?

What do we see animals do?

What does winter look like?

What do people do differently?

What happens to the days?

How do people wear to adapt?

What happens to the plants?

What Is Winter?

Winter is one of the four seasons.

Click on the winter season to see which months are in winter.

Autumn

Winter

Summer

Spring

December

January

February

What Weather Will We See?

What has the weather been like this week?

What has the temperature been like?

As the season changes to winter, the temperature begins to fall, which means it gets even colder.

We might notice...

- more rain
- frost and ice
- thunder and lightening
- hail and snow

← What Does Winter Look Like?

We might see more snow in winter or often picture snow when we think about winter...

...but does it always snow in the UK in winter?
Does it have to snow to be winter?

← What Happens to the Days?

What have you noticed about the time you have to play outside after school recently?

We will notice:

- that there are fewer hours of daylight;
- that the nights last longer.

Winter has the least amount of daylight and the longest nights of all the seasons.

Month	Sept	Oct	Nov	Dec	Jan	Feb	Mar	April	May	June	July	Aug
Hours of sunlight	13	11	9	8	8	10	12	14	15	16	16	14

What Happens to the Plants?

Do the same flowers grow all year round?

We might notice:

- that many trees lose their leaves and their branches go bare;
- that there are not as many flowers.

← What Do People Wear to Adapt?

In winter, what clothes do you wear? How do you keep warm?

We often wear different things in winter than we do in the spring and summer.

We might notice people wearing...

- more layers of clothing
- gloves, hats and scarves
- coats
- trousers
- thicker jumpers
- boots and wellies

← What Do People Do Differently?

In winter, what do you like to eat and drink?
What do you do more of?

We often eat, drink and do different things in winter than we do in the spring and summer.

We might notice people:

- skiing, sledging or snowboarding;
- playing in the snow;
- eating warming foods like soup;
- drinking more hot drinks.

← What Do We See Animals Do?

Animals cope with winter weather differently.

We might notice some animals **hibernating** for some, or all, of the winter.

Click on the pictures to name each one.

bats **hibernate**

adders
hibernate

hedgehogs
hibernate

dormice
hibernate

← What Do We See Animals Do?

We might notice that other animals **migrate** (travel) to a warmer place.

Click on the pictures to name each one.

Lots of birds,
like the
swallow,
migrate.

Some
butterflies, like
the monarch
butterfly,
migrate.

Most whales
migrate.

Most dolphins
migrate.

← What Do We See Animals Do?

We might notice that some animals **adapt** by changing their behavior or their bodies.

Click on the pictures to name each one.

Exmoor ponies **adapt** to winter conditions by growing an extra layer to their brown coats.

Herdwick sheep can survive harsh winters because they have blizzard-proof fleeces.

Arctic foxes **adapt** by changing the colour of their fur coats to match their surroundings in winter conditions.
