

Knowledge Organiser - Down in the Jungle - Class 2

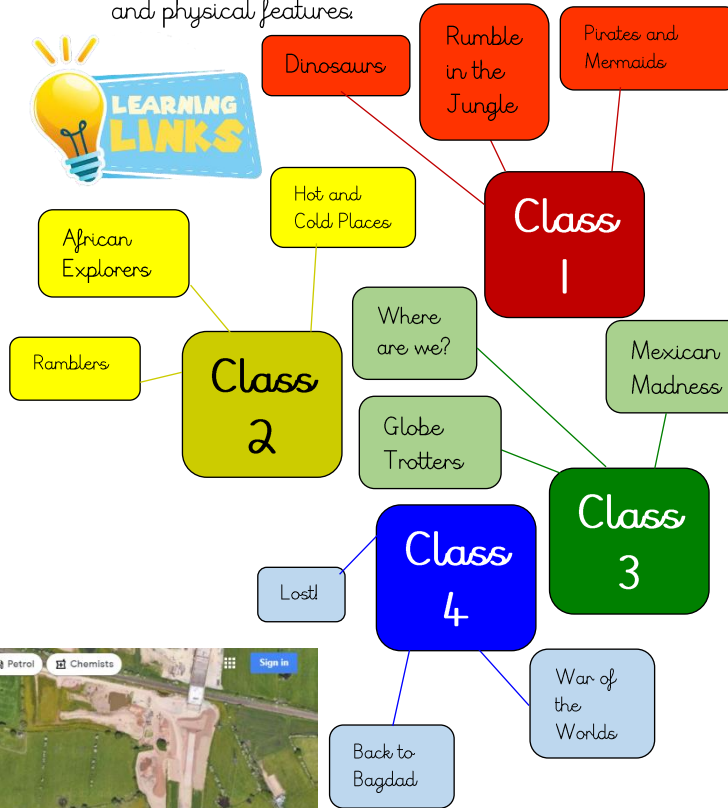

BIG Idea

There are 195 different countries around the world; all of which can have many similarities and differences between them. When we look at any individual country, town or city, they are made up of both human and physical features.

Sticky Knowledge

- ✓ There are 7 continents on Earth- these are North America, South America, Europe, Asia, Africa, Australasia and Antarctica.
- ✓ There are 5 oceans around the earth- these are Atlantic Ocean, Pacific Ocean, Indian Ocean, Southern Ocean and Arctic Ocean.
- ✓ The Atlantic is the largest ocean in the world.
- ✓ Asia is the largest continent in the world.
- ✓ Human features are things made by humans- these can include buildings, roads, vehicles and bridges.
- ✓ Physical features are naturally made- these include forests, cliffs, caves and rocks.
- ✓ An Ordnance Survey map is a very detailed map of a place in the UK.
- ✓ There are many symbols on an Ordnance Survey map that tell you what is in a particular place.
- ✓ When you look at 2 different places around Britain, they can have many similarities and differences.
- ✓ An atlas can be used to look at countries all around the world.
